H3500 DRINKING WATER SYSTEM

GET A TAP YOU CAN TRUST

Do you ever wonder what might be hiding in your glass of tap water? It may look clear, but there are many things that could be lurking in every glass.

Reverse osmosis (RO) drinking water systems are a point-of-use microscopic filtration solution. Contaminants like arsenic, lead, and nitrates are reduced by a membrane inside and flushed to the drain, helping to protect your family.

The **Hague WaterMax® H3500** drinking water system can provide high quality water right from your faucet. Get peace of mind while giving your family the best with a new RO filter.

Multi-Stage Filtration
Higher Quality Water

Budget Conscious
Low Operating Costs

Protect Your Family
Reduces Harmful Contaminants

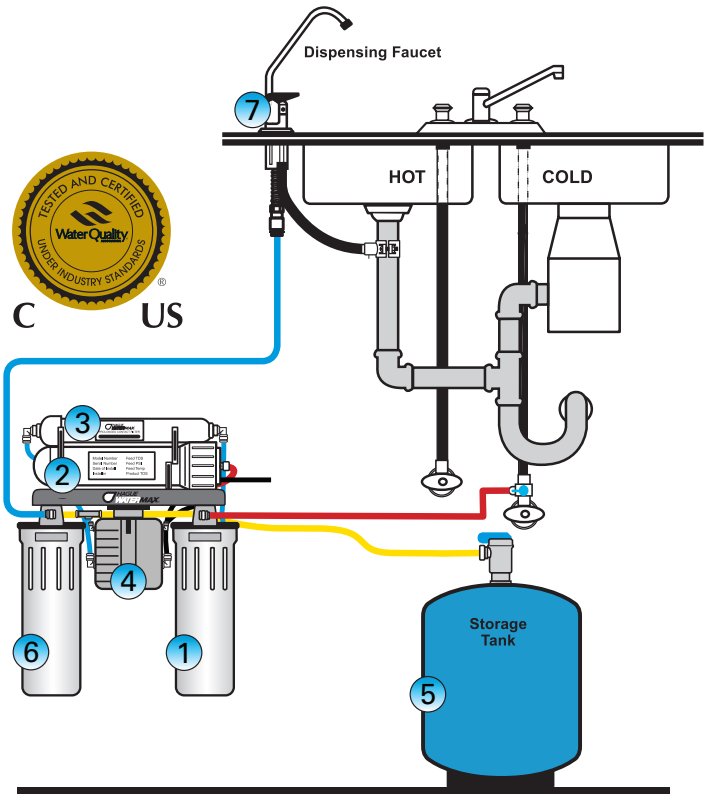

Minimize Waste
Reduces Bottled Water Use

HAGUE WATERMAX®

SYSTEM FEATURES

HIGH PERFORMANCE
MEETS LOW MAINTENANCE

1. Pre-filter reduces chlorine, sediment, and other particles to prolong the life of the membrane cartridge
2. Membrane filter provides microscopic contaminant reduction
3. Prolonged contact filter ensures reduction of any remaining contaminants
4. Non-electric pump fills tank five times faster than conventional RO Systems
5. Stores up to 3 gallons of water
6. Carbon post-filter provides a final polish before delivery
7. Includes long-reach dispensing faucet

The H3500 and H6000 systems are certified by the Water Quality Association according to NSF/ANSI 58, NSF/ANSI 372 and CSAB483.1; see performance data sheet for specified claims.
