

DRINKING WATER FOR THE MASSES

Are you looking for the higher quality water for your business? The **LC100P Reverse Osmosis** system is a filtration solution built to last for industrial use, making it perfect for coffee shops, movie theaters, and even large homes.

Reverse Osmosis (RO) drinking water systems use a variety of stages to provide water filtered down to the microscopic level. Contaminates like arsenic, lead, and nitrates are all reduced by a membrane inside and flushed to the drain, protecting your family.

The **LC100P** drinking water system can provide the higher quality water with minimal waste with its patented high efficiency design. Have peace of mind with our certified unit while giving your customers higher quality water.

Multi-Stage Filtration
Higher Quality Water

Budget Conscious
Low Operating Costs

Protect Your Customers
Reduces Contaminants

High Capacity
Large Volume Water Delivery

HIGH PERFORMANCE MEETS HIGHER QUALITY

1. **PRE-FILTRATION PROTECTION:** Dual function pre-filter reduces suspended and particulate matter from incoming tap water down to 1 micron. Also will reduce chlorine, taste and odor before continuing to help protect the life of the RO membranes.
2. **DOUBLE MEMBRANE CONFIGURATION:** RO semi-permeable membrane targets and reduces 13 contaminants, including fluoride, lead, nitrates and nitrites. Also reduces remaining suspended solids and dissolved solids from the water molecules.
3. **POLISHING FILTER:** Carbon block filtration cartridge to reduce any additional tastes and odors before delivered to your tap.
4. **PERMEATE PUMP:** Non-elective pump helps treated water travel quickly for fast fill-ups.
