

ELEVATED WATER FILTRATION

Hague Hydroclean HC3 acid neutralizers provide a solid solution to neutralize water with a low pH. Acidic water can be harmful to your entire plumbing system by accelerating the corrosion process. Metals that are stripped from your plumbing will also cause blue/green staining as they are deposited on your fixtures.

Acidic conditions are common with well water from certain areas of the country and can often be treated with a single Hague Hydroclean HC3 acid neutralizing filter. Upon contact with our media, acidic waters slowly dissolve the calcium carbonate to raise the pH which reduces the potential leaching of copper, lead and other metals found in typical plumbing systems.

pH Correction
Reduces Bitter Tastes

Preserves Plumbing
Helps Prevent Leaks in Pipes

Reduces Staining
Helps Stop Blue/Green Staining Deposits

Ease of Operation
Simple and Efficient

10 YEAR LIMITED WARRANTY

HAGUE
Quality Water International®

ENHANCED FILTRATION FOR HIGHER WATER QUALITY

1. PATENTED VALVE: Built-in bypass to preserve the media for times you don't need treated water, like watering the lawn.
2. DIGITAL CONTROLLER: Provides quick, simple setting adjustments.
3. EFFECTIVE MEDIA: A blend of calcite and corosex media dissolves to neutralize water as it passes through the system.
4. GRAVEL BEDDING: Provides consistent and efficient water flow throughout the tank.
