

REFRESH YOUR HOME'S WATER

Life in the city can be convenient, but it also comes with some downfalls when it comes to your water. Municipal water sources need to add chlorine to protect the water from bacteria as it travels through the system to your house. Once you are ready to use the water, this layer of protection is no longer needed and can cause strong odors or affect the taste if left untreated.

High levels of chlorine can also dry out sensitive skin while bathing. The chemical can strip away your body's natural oils, leaving skin and hair brittle and itchy.

With the Hague Hydroclean HC3 Activated Carbon Filter, you can enjoy fresher water with fewer odors from every faucet. Our automated, self-sufficient filter is designed to efficiently reduce chlorine as water passes through the tank. This low maintenance filtration system requires no on going replacement costs like other carbon filters available today. Bringing you a more worry-free way to water for you and your family to enjoy.

Environmentally Safe
No Chemicals

10 Year Warranty
Backed By The Manufacturer

Cost Savings
Self-Sufficient Cleaning

Enhanced Quality
Reduces Foul Tastes and Odors

HAGUE
Quality Water International®

WATER YOU WILL LOVE TO USE

1. ENHANCED TECHNOLOGY: Patented valve design includes built-in bypass to the filter when it's unnecessary, like watering the lawn.
2. DIGITAL CONTROLLER: Provides an easy to read screen to make setting adjustments, see current flow rate, and hold your programming during a loss of power.
3. HIGH-PERFORMANCE MEDIA: Activated Carbon reduces the chlorine to help prevent id from traveling into your home for the life of the product, eliminating the need for costly filter replacements.
4. GRAVEL BEDDING: Provides consistent and efficient water flow throughout the tank.
